

Alert cards are available to our members, not only as a membership card but as a useful aid when a TN pain attack occurs. Your TN Alert card will not only ensure that you receive sympathy and understanding, but stop well-intentioned but ill-informed strangers ringing for a doctor or an ambulance when all you require is a quiet environment for a while. The Alert card will give you security and reassure those who are near you. They are credit card size and can fit easily inside a purse or wallet, or can be worn around the neck on a lanyard.

| | <i>Facing pain together</i> |
| | I suffer from Trigeminal Neuralgia, an extremely painful facial condition, that can make talking impossible. |
| | There is nothing that you can do to relieve the pain but can you please help me to find a quiet place where I can recover in peace. |
| Thank you very much. | |
